# ReactJS Developer – Quant Trading Systems

## #1 Job Overview

We are looking for an experienced ReactJS Developer to complement the existing cross functional team. As the driving person, you are closely working together with the team and the head of development to define and implement future releases of AlgoTrader. You will be part of the AlgoTrader core development team in Poland.

There is an immediate need to push the upcoming releases in the remainder of 2020 and all of 2021 and beyond:

- ✦ AlgoTrader configuration frontend
- ✦ Expanding the order book frontend
- ✦ New frontend for backtesting
- ✦ Smart Order Routing (SOR) frontend enhancements
- ✦ Request for Quote frontend
- ✦ Frontend for strategy development

## #2 Responsibilities

- ✦ Design and implementation of future releases of the AlgoTrader Web UI ([demo.algotrader.com](https://demo.algotrader.com))
- ✦ Close collaboration with product management, development team, head of development and customers

## #3 Knowledge & Experience

- ✦ React.JS deep expertise
- ✦ At least 5 years hands-on professional experience in frontend development
- ✦ Experience with agile and test driven development
- ✦ Experience in working in a distributed global environment
- ✦ Preferably worked in the trading world or exposure to the capital markets

## #3 Required Skills

- ✦ Hands-on experience with HTML5, ReactJ
- ✦ Very good expertise in software patterns and architectural enterprise concepts
- ✦ Hands-on experience with Git
- ✦ Very strong communication skills and fluent in English
